

Duct silencer Kappa

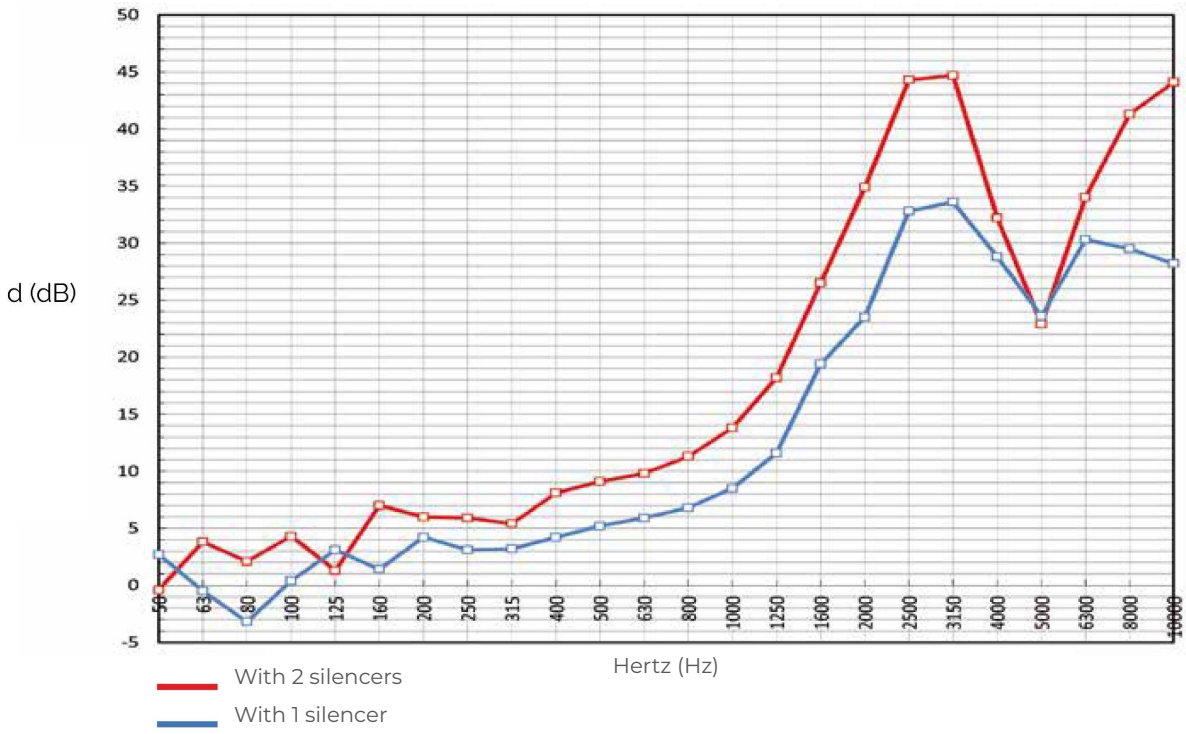

Item	Colour	L mm	ø i mm	ø t mm
STK157B	white	540	150x70	159
STK229B	white	620	220x90	159

Description: Pre-assembled acoustic silencer for rectangular ducts

Material: ABS plastic

Features: The Kappa silencer is a certified product and is being sold assembled with inlets, or you can compose it as you wish based on construction site needs. It is used to prevent external noises from entering the ducting and housing units. It also avoids the spread of annoying reverberation that can be created inside the ducting once the extractor hood extractor is turned on. Suitable for ducts with temperature 80°C max.
